Healthcare Training Case Study

Training Course for NHS Trust

Background

WCS Group have been working with a number of NHS Trusts across the UK to deliver compliance solutions. We have ensured our clients have access to a number of delivery options including onsite, virtual and in-centre training. We have recently enjoyed providing training for one NHS Trust at their multiple sites.

The Challenge

Yasmeen Bashir our Business Development Manager, began the relationship between WCS Group and the Trust back in 2022 with their Acting Head of Estates and Estates Manager. Yasmeen has known the team from a previous walk of life and was tasked with

assisting them with a number of onsite compliance training courses to meet their challenging training matrix requirements.

The Trust was looking for support in both Water and Mechanical & Electrical disciplines. Yasmeen was more than happy to organise and accommodate City & Guilds accredited training for their team across their multiple hospital sites.

Healthcare Case Study

The Solution

The courses which aligned with the trust's training matrix, included the delivery of City & Guilds accredited Competent Person Water, Competent Person Low Voltage, Competent Person Mechanical & Pressure Systems training along with Lift Entrapment.

Value Added

Training officially began mid-end of 2022, and to date, we have received fantastic feedback from their estates and management team who were in attendance.

The trust placed confidence in WCS Group to deliver a number of onsite and they have since put forward requests for further training quotes in other areas.

If you are requiring support with a remediation project or you are simply looking to improve fire safety within your premises then look no further than our air division.

Training service delivered by Hydro-X Training Part of the WCS Group.
