

Atana Chemical Service

WE'VE GOT YOU COVERED

Flexible solutions built around your business needs

Your wastewater treatment partner

Complete chemical solutions under one roof

At Atana we specialise in a wide range of chemicals specifically designed for effluent and wastewater treatment processes.

Our solutions help customers achieve optimal results with a single, reliable supplier. Our products are designed to meet your specific site needs and improve the efficiency of your treatment operations.

How can we help:

- Quick lead-times
- Flexibility on low volume orders
- No deposit required for IBC containers
- Order price can include free delivery to mainland UK
- Small volume blow-over deliveries to bulk tanks available
- Dedicated HGV fleet
 - overnight carrier also available
- Chemical & equipment trials to improve optimisation

We are committed to providing high-quality chemicals and services that optimise your wastewater treatment processes while offering exceptional customer support.

Chemical trials

Designed to help reduce both costs and environmental impact

As your trusted partner, we offer pilot and full-flow trials, designed to ensure the optimal mechanical and chemical combination for your wastewater treatment process.

These trials help identify opportunities for reducing disposal costs and MOGDEN charges, all while maintaining compliance with environmental regulations.

Our onsite trials allow you to test various chemicals, including sustainable options, to determine their effectiveness in treating wastewater under real-world conditions. The process involves laboratory-based testing followed by a short on-site trial, with a comprehensive report to validate treatment effectiveness and highlight potential improvements and savings.

If you're not ready for a capital investment, we offer flexible short and long term hire options to keep the process affordable and scalable.

Emergency hire

Giving you the time to plan and implement a permanent fix

Hiring emergency equipment provides an immediate enhancement to effluent treatment, ensuring compliance is met while giving your business the flexibility to plan for a permanent solution.

Our mobile hire equipment is available on both short and long-term bases, giving you the breathing room needed to implement long-term fixes without compromising operational compliance standards.

Service and Maintenance

Ensuring regulatory compliance

We offer tailored service and maintenance contracts to meet your site's specific needs. Our flexible solutions include daily, weekly, or monthly visits to ensure the smooth operation of your entire plant.

Additionally, we provide regular or on-demand service visits, during which we can fully empty, strip, and service your plant. This includes replacing any worn consumable parts, refilling the system, and optimising operations. After setup, we conduct laboratory testing on both raw and final discharge for removal rates. A detailed report with repair recommendations or improvement suggestions will follow.

Our flexible services encompass:

- **Single repairs visit to replace parts**
- **Complete design, construction, and commissioning of new plants**
- **Comprehensive data history for both internal and external audits**
- **Laboratory testing with full reports**

About Marlowe Environmental Services

Your trusted partner for environmental compliance solutions

Atana is part of Marlowe Environmental Services, which is a leading group in the UK specialising in services related to water, wastewater, air hygiene and property compliance.

At Marlowe, we are committed to ensuring your business meets the highest standards of environmental compliance. With a team of over 1,700 professionals, we provide extensive coverage across the UK and Ireland, delivering reliable solutions tailored to your needs.

Our comprehensive range of services includes:

- **Wastewater Management:**
Effective management of wastewater systems to meet environmental standards and reduce carbon footprint
- **Water Hygiene and Treatment:**
Safeguarding water systems to ensure compliance with health and safety regulations
- **Air Hygiene:**
Improving indoor air quality through regular maintenance and system management
- **Clean Water Engineering:**
Ensuring the provision of safe and clean water through expert engineering solutions
- **Property Compliance:**
Helping businesses stay compliant with the latest legislation and regulations
- **Training:**
Offering specialised training to ensure your team is well-equipped to manage environmental compliance
